Whitefield, Bangalore 560067 | +91-81480 18128 | sudhabaskar2811@gmail.com
linkedin.com/in/sudhabaskaran-37a502215 | Available Immediately

.NET DEVELOPER | ASP.NET | C# | SQL SERVER | WEB API

Professional Summary

.NET Developer with 3+ years combined experience in software engineering and technical teaching. 10 months building production web apps at Purple Quay Global (Chennai) using ASP.NET, C#, SQL Server, followed by 3 years teaching .NET, database design and front-end at engineering level. Strong in relational data modelling and server-side C#. Returning to full-time development in Bangalore; available immediately.

Technical Skills

Languages & Frameworks: C#, ASP.NET MVC, ASP.NET Core (basics), Web API, JavaScript, jQuery, HTML5, CSS3, Bootstrap

Databases: Microsoft SQL Server (MSSQL), MySQL Workbench, T-SQL, Stored Procedures, Schema Design, Indexing, Query Optimization

Tools & Practices: Visual Studio, IIS, Git, REST API, Responsive UI, Debugging, Defect Fixing, Technical Documentation

Spoken Languages: Tamil (native), English (professional)

Professional Experience

Lecturer — Computer Science & AIDS | MNSK College of Engineering, Pudukkottai

Oct 2023 – Jul 2026

- Taught web application development in Microsoft .NET and C# to undergraduate engineering batches, covering the full request lifecycle from controller logic through data access to deployment.
- Built and maintained the lab exercises for database programming in MSSQL Server and MySQL Workbench — schema design, T-SQL queries, joins, and stored procedures.
- Ran hands-on workshops on HTML, CSS, Bootstrap, JavaScript, and jQuery, wrote reference implementations for 120+ students.
- Technical reviewer for final-year projects, debugging code across C# backend, SQL layer, and frontend.

Junior Software Engineer | Purple Quay Global, Chennai

Oct 2022 – Jul 2023

- Developed and maintained web applications in ASP.NET with C#, delivering new features and fixing defects in an existing production codebase.
- Designed and managed database schemas in MSSQL Server and MySQL, tuning queries and indexes to cut data-retrieval time on the slowest reporting screens by approximately 15%.
- Refactored server-side C# and data-access code, improving page response times by approximately 20% on the modules worked on.
- Implemented responsive UI components with Bootstrap, HTML, CSS, and jQuery, replacing fixed-width pages so the application rendered correctly on tablet and mobile.

Projects

Works Manager — Internal Job Management System

ASP.NET (C#), MySQL

- System for logging, assigning, and tracking internal jobs through to closure. Built the C# business layer and the MySQL schema behind job records, assignment history, and status transitions; implemented the search and filter screens in jQuery.
- Implemented role-based access and CRUD workflows using ASP.NET (C#) to reduce manual tracking overhead.

Pollinate Group LMS — Learning Management System

ASP.NET (C#), MSSQL Server

- Learning management platform for remote teaching during the COVID period, covering course content delivery, student enrolment, and submission tracking. Implemented role-separated staff and student access, the MSSQL Server data model, and the responsive Bootstrap front end.

Certifications

- Certified Web Professional — Web Design and Web Development

Jun 2022 – Oct 2022

Education

B. Tech, Information Technology

Jun 2017 – Jun 2021

Mookambigai College of Engineering, Pudukkottai, Tamil Nadu — CGPA : 7.82

HSC and SSLC — Maharishi Vidya Mandir Matric Hr. Sec. School, Karaikudi

Jun 2015 – Jun 2017
